sedak at InnoTrans 2024 (Hall 1.1/300)

Premium Glazing Solutions for Rail Vehicles

sedak, global leader in glass refining, will be making its debut at InnoTrans, the international trade fair for transport technology in Berlin. From September 24 - 27, sedak will showcase its comprehensive product portfolio for trains and rail vehicles in Hall 1.1, Stand 300. Renowned for top-notch quality, extensive expertise, and absolute punctuality in architectural and marine glazing, sedak is now extending its profound glass expertise to the rail sector, thus strengthening this business area.

“InnoTrans offers the optimal platform to present our portfolio to rail vehicle manufacturers and operators. Our glass products are specifically tailored to the high demands of the rail industry. By strengthening our Rail division, we are not only solidifying our market position as a versatile and forward-thinking glass refiner but also aim to actively shape the market – just as we have long done in the architecture and marine sectors,” said Kevin Berni, Head of Sales at **sedak**.

sedak provides a full range of special and standard products for high-speed trains, regional trains, and public transport. This includes complex curved windshields, cab side windows, side windows, and interior glass products.

sedak – leading glass

Since its founding in 2007 **sedak** has used its pioneering spirit to establish itself as a premium manufacturer of large-format insulated and safety glass. **sedak** has evolved their glass as a construction material for all-glass facades and roofs. iconic facades and buildings are created with an unprecedented degree of transparency thanks to superior quality of innovative products.

On a production area of 58,000sqm and with a unique machine park, raw glass is processed, bent, tempered, laminated, and converted into insulating glass. The machine park is designed for oversized formats (up to 3.6m x 20m) and complex glass products. This enormous production capacity allows **sedak** to realize even the most demanding visions. Thus, glass products of the highest quality are created in Gersthofen/Germany for the architecture, marine, and rail sectors.

With over 15 years of experience in processing and finishing flat and curved glass, **sedak** offers comprehensive glass solutions for iconic architecture, luxurious ships, and modern trains. An unwavering commitment to customer visions, maximum flexibility, and close collaboration with all project partners ensure market-oriented solutions for seemingly impossible requirements.

Outstanding references demonstrate this impressive competence, including: Apple Cube, New York; Elbphilharmonie, Hamburg; National Museum, Oslo, Norway; The Henderson, Hong Kong; L'Oréal Le Visionnaire, Paris; numerous premium flagship stores; luxury yachts; and train sets.
